PROFESSIONAL SUMMARY

Data Modeler with 4+ years of experience in Data Centralization, Data Integration, Data Migration, Enterprise Data Management and Big Data Analytics projects across Healthcare, Clinical Research, Telecommunications, Retail and Logistics domains. Expertise in Enterprise Data Modeling, ER Modeling, Dimensional Modeling using Kimball and Inmon methodologies. Designed Conceptual, Logical and Physical Data Models. Skilled in SQL, PySpark, Spark SQL, Python, enforcing Data Quality & Data Governance, Metadata Management, Data Lineage. Experienced with Snowflake, Azure Databricks, AWS, Teradata, Oracle Data Warehouse. Proficient in designing Star and Snowflake Schema solutions for data warehousing, along with a foundational understanding of Data Vault concepts & ETL CI/CD pipelines.

TECHNICAL SKILLS

- **Data Modeling:** Dimensional Modeling, Enterprise Data Modeling, ER Modeling
- **Programming & Query Language:** SQL, Python, PySpark
- **Cloud Database & Datawarehouse:** Snowflake, Azure Databricks, AWS S3, Teradata
- **Certificates:** Microsoft Azure Az-900, GenAI Foundation - GenAI Assisted Coding using Amazon Code Whisperer

WORK EXPERIENCE

Deloitte Consulting India Private Limited

(25th Nov 2024 – Till Date)

Project: Canada Post – Enterprise Data Management

Client: Canada Post (Retail, Logistics & Digital Services) [18th Feb 2025 – Present]

- Developed enterprise data models using ERWin, implemented SCD Type 1 & Type 2 historical load strategies.
- Applied forward engineering and impact analysis, and supported database performance tuning.
- Collaborated with business stakeholders to understand requirements and provide data architecture solution.

Project: Genome – Data Quality & Data Modeling Post

Client: Charter Communications (Telecommunications) [4th Dec 2024 -17th Feb 2025]

- Applied reverse engineering to develop physical data models, define parent-child relationships, create dataset mappings and analyzed data flows across enterprise data pipelines.
- Performed data profiling, data quality assessments, metadata management and data lineage validation.

Persistent Systems Limited

(18th July 2022-22nd Nov 2024)

Project: Data Lake Ingestion & CDM Program

Client: Syneos Health (Health Care & Life Science Project) [15th Nov 2023 -22nd Nov 2024]

- Worked as Data Modeler Lead and developed Conceptual, Logical and Physical Data Models for enterprise Data Marts and developed ETL pipelines/Script using Scala-Spark, DataFrames and Azure Databricks clusters.
- Designed entity relationships, Primary Keys, Foreign Keys, identifying and non-identifying relationships, conformed dimensions and business catalogue structures.

Project: Biopharma Solutions Data Integration

Client: Client: Baxter (Health Care & Life Science Project) [Dec,2022 -Oct,2023]

- Developed Star and Snowflake schema-based dimensional models and established relationships between facts and dimensions Created Source-to-Target Mapping (STTM) documents, reporting views and DDL objects.
- Performed normalization, denormalization, indexing, database performance tuning and query optimization.
- Supported reporting requirements, ETL validation, defect reporting, UAT testing and production deployments.

EDUCATION

- **Bachelor of Technology in Electrical Engineering** - Techno Main Salt Lake • Kolkata • 2022 • 8.80 CGPA
- **12th** - D.A.V. Public School • Dhanbad • 2017 • 86.6%
- **10th** - D.A.V. Public School • Dhanbad • 2015 • 9.4 CGP
